

# Public Meeting

## Hyde County Flood Resiliency Plan

Thursday, March 3, 2016

9 AM to 1 PM Meeting and Feedback Session

Hyde County Government Center, 30 Oyster Creek Rd., Swan Quarter, NC

The Hyde County Government Office and North Carolina Sea Grant have been exploring ways to make homes, farmland and infrastructure less susceptible to flooding. Progress on this work will be presented at a public Town Hall meeting on March 3. County residents are encouraged to come learn about Sea Grant and Stetson University's continued work to explore the costs and benefits of options for reducing flood damage that Hyde County Residents have asked them to study.

Sea Grant team members will ask for feedback on an economic analysis of some proposed flood-mitigation options. The group will also discuss preparing for Hyde County's Community Rating System (CRS) review in late 2016, developing a flood preparation guide for Hyde County residents, and a number of other ongoing research projects that may help address flood issues that are outside the scope of the Sea Grant work.

The meeting will be hosted on March 3 at the Hyde County Government Center and will start at 9 AM. Please RSVP to Rosemary Johnson at (252) 926-4474 by 12 pm March 2.
