## NATIONAL STALKING AWARENESS MONTH JANUARY 2017

Stalking refers to repeated harassing or threatening behavior by an individual, such as following a person, appearing at a person's home or place of business, making harassing phone calls, leaving written messages or objects, or vandalizing a person's property, according to the U.S. Department of Justice Office for Victims of Crime (OVC).

Any unwanted contact between two people that directly or indirectly communicates a threat or places the victim in fear can be considered stalking, but the actual legal definition of stalking varies from state to state according to each state's laws.

### Stalking Statistics

According to the [Stalking Resource Center](#):

- 6.6 million people are stalked annually in the US.
- One in six women and one in 19 men have been stalked.
- 66 percent of the women and 41 percent of the men were stalked by a current or former partner.
- 46 percent of the victims had at least one unwanted contact weekly from the stalker.
- 11 percent of stalking victims have been stalked for five years or more
