

# You've got the power. Pink Power.

Join Vidant Health and our physician partners to learn how early detection, regular screenings and advanced treatment options can give you the power against breast cancer. It's all part of the Pink Power speaking tour, a series of breast cancer events planned across eastern North Carolina.

At this year's Pink Power event, we're featuring DeLores Pressley, a sought-after expert on confidence and motivation, presenting *The Power of an UP Woman*. You'll be inspired by her mantra, "Be Undeniably Powerful," and motivated to take back the power that belongs to you.

Keynote speaker  
DeLores Pressley

One way you can use your power is to attend one of our FREE local breast cancer screenings. Women of all ages should have an annual breast examination by a clinical provider.

## Join us for Pink Power and a FREE breast cancer screening in your home town
