

# HYDE COUNTY TELEMEDICINE

## A New Way to See a Doctor, Close to Home

Want to see a doctor without driving an hour or more? Hyde County Telemedicine lets you see and talk to one through a video conferencing system. And with the help of a nurse who is with you, the doctor is able to examine you to make a diagnosis and prescribe treatment, whether you are sick and for management of chronic conditions like diabetes and high blood pressure.

Appointments will be available at the Hyde County Health Department, 1151 Main Street, Swan Quarter, beginning February 26. For more information or to make an appointment, call (252) 926-4399.
